QUANTARA SYSTEMS

QS1 · SYSTEMATIC EXECUTION FOR COMEX GOLD FUTURES

Discipline, engineered.

QS1 is an automated execution system for COMEX gold futures. It reads market conditions, sizes each position from a fixed risk budget, checks every order against hard limits and places the trade by rule. The same process runs every session, whether you are watching or not.

MARKET	COMEX gold futures
EXECUTION	Fully automated, rules-based
RISK CONTROLS	Four independent layers
OVERSIGHT	Monitored every session
ACCESS	By consultation, limited capacity

01 · THE PROBLEM

Most traders lose money on execution. The strategy is usually sound. Late entries. Targets moved out of greed. Stops widened after a loss. Valid setups skipped after a losing streak. Each mistake is small on its own. Over hundreds of trades, they decide the result. QS1 is built to close that gap.

02 · THE PROCESS

01 **Ingest.** Read the market as it moves.

02 **Classify.** Trade only in the right conditions.

03 **Evaluate.** Fixed rules decide every entry.

04 **Verify.** Every order is checked before it is sent.

05 **Execute.** Entry, stop and target go out together.

06 **Manage.** Each trade is managed through to exit.

03 · RISK ARCHITECTURE

L1 **Trade.** Every position has a hard stop.

L2 **Session.** Daily limits end the session.

L3 **Account.** Drawdown rules built into sizing.

L4 **System.** A kill switch above everything.

04 · ENGAGEMENT

01 **Private consultation.** A 45-minute call about your goals, your experience and whether QS1 fits. No obligation.

02 **Account setup.** We guide you step by step through opening a funded futures account that meets QS1's requirements.

03 **Secure connection.** You share execution-only credentials through an encrypted intake. We configure and connect your account.

04 **QS1 goes live.** The engine starts trading your account by rule, and our team monitors every session.

COMPATIBILITY

Proprietary trading firms: Topstep, Lucid Trading. Execution and analysis platforms: Tradovate, NinjaTrader, TradingView.
